HEATER USER GUIDE

KEY BENEFITS:

- ◆ **Bright LED Display**
Easy-to-read display for temperature settings and timer.
- ◆ **Auto Shut-Off**
Reduces power usage by automatically turning off when the desired temperature is reached.
- ◆ **Temperature Range: 60°F to 90°F (15°C to 32°C)**
Adjustable for personalized comfort.
- ◆ **Efficient PTC Ceramic Heating Element**
Provides rapid, energy-efficient warmth while lowering energy consumption.
- ◆ **500W Power**
Delivers effective heating with minimal energy consumption.
- ◆ **1-12 Hour Timer Function & 2 Speed Settings**
Customize your heating schedule and fan speed for optimal comfort.
- ◆ **180° Rotatable Plug**
Allows flexible, space-saving wall outlet use.

HEATER COMPONENTS:

- ◆ **Fan Grid:**
Ventilation area for air circulation.
- ◆ **PTC Heating Element:**
Core heating element.
- ◆ **Back Grid:**
Rear ventilation or protection grid.
- ◆ **Main Power Switch:**
Turns the heater on/off.
- ◆ **Control Panel:**
Interface for adjusting settings.
- ◆ **Power Plug:**
Used to connect the device to an electrical outlet.
- ◆ **Indicator Light:**
Shows operational status.

WHY CHOOSE POWER PRO GENIUS HEATER?

This compact, lightweight heater is perfect for any room or travel, offering reliable and energy-efficient warmth. Save on energy costs with its auto shut-off and adjustable temperature controls, while enjoying hassle-free heating wherever you are.

GENERAL SAFETY INSTRUCTIONS:

- ◆ **Keep Away from Children:**
This appliance is not a toy. Supervise children during use.
- ◆ **Burn Risk:**
Avoid touching the heater's hot surface. Use handles or wait until it cools before moving.
- ◆ **Avoid Fire Hazards:**
Do not block air intake or discharge. Ensure all flammable objects are kept at least 24 inches (61 cm) away from the heater at all times.
- ◆ **Electrical Safety:**
Unplug the heater when not in use, and avoid using it while sleeping or unattended.

HOW TO USE

- ◆ **Plug in the Heater:**
Plug the heater into a 110-125V/50Hz socket. Ensure it is switched off before plugging it in.
- ◆ **Turn On the Heater:**
Set the main switch to "I" (On) to enter standby mode. Press the ON/STANDBY button to activate the heater.
- ◆ **Temperature Control:**
The default maximum temperature is 90°F (32°C). Use the Temp Up/Down buttons to adjust the desired temperature (between 60°F and 90°F). The thermostat will maintain your set temperature.
- ◆ **Fan Speed:**
Press Temp Up and Temp Down simultaneously to toggle between low (LL) and high (HH) fan speeds.
- ◆ **Timer Function:**
Set the timer (up to 12 hours) using the Timer button. The display will show the number of hours before automatic shut-off.
- ◆ **Shut Down:**
Press the ON/STANDBY button to stop heating. The fan will continue running for 60 seconds to cool down before fully shutting off. Use the main switch to turn the heater off completely.

SAFETY FEATURES:

- ◆ **Overheat Protection:** The heater will automatically shut off if it overheats. Unplug, cool down, and remove any obstructions before resuming use.
- ◆ **Auto Shut-Off:** The heater turns off when the set temperature is reached to save energy.

DISPOSAL INSTRUCTIONS:

- ◆ **Proper Disposal:**
Do not dispose of the heater as household waste. Take it to a local recycling facility.
